[Credly/Ramirez_Miguel](#)

IT expert with over a decade of experience across the DACH region, specializing in technical consulting and infrastructure modernization. Following tenures at the Data Center for the Humanities of University of Cologne and Deloitte's Systems Engineering (CT&SE) practice, I currently serve as a Senior Account Cloud Engineer at Oracle.

I focus on the analytical side of technology—optimizing Oracle footprints and advising on cloud strategy—rather than full-scale implementation.

As a certified Engineer (CKA, CKAD, OCI, AWS), I specialize in bridging the gap between complex business needs and technical architecture. While my role is broad and generalist in nature, I act as the primary architectural lead—engaging and coordinating with specialist teams for deep-dive implementations when specific technical granularity is required.

Certifications

Cloud Native Computing
Foundation (CNCF)

Advanced Cloud Engineer IT Professional
CKA: Certified Kubernetes Administrator
CKAD: Certified Kubernetes Application Developer
KCNA: Kubernetes and Cloud Native Associate

SAP

SAP ABAP Foundations
SAP ABAP Advanced

Oracle Cloud Infrastructure (OCI)

Solutions Architect Professional
Multi Cloud Architect Professional
Security Professional
Networking Professional
Autonomous Database Professional
Database Services Professional
Migration Architect Professional

Amazon Web Services (AWS)

AWS re/Start Graduate
Certified Solutions Architect – Associate
Certified Developer – Associate
Certified Security – Specialty

	Certified Cloud Practitioner
Other	CISCO English for IT 1 SCRUM Alliance Certified Developer (CSD) Ttture Cloud Transformation Associate
Languages	English (B2) German (C2) Spanish (native) Portuguese (elementary)

Work experience

Oracle | Amsterdam, Netherlands — 06.2024 – Current

Senior Account Cloud Engineer | 05.2025 – Current

- Act as a versatile trusted advisor, collaborating closely with pre-sales managers and subject matter experts to deeply understand customer objectives.
- Partner with Cloud Architects to design, implement, and continually guide customers in adopting, optimizing, and governing cloud-native enterprise solutions on Oracle Cloud Infrastructure (OCI).
- Demonstrate business value through clear vision, scalability models, thorough assessments, and sound technical architectures.

Tech Stack: Oracle Cloud Infrastructure (OCI) | Oracle Database Services | Oracle Autonomous AI Database | Kubernetes Engine (OKE)

Senior Technical Solutions Engineer | 06.2024 – 05.2025

- Served as a Technical Solutions Engineer for database platforms in the DACH region, providing on-premises, hybrid, and cloud technology solutions.
- Translated business requirements into technical architectures while focusing on container technologies, OCI, and AI-driven data solutions.
- Designed and implemented scalable POCs to support enterprise-level data management and digital infrastructure modernization.

Tech Stack: Oracle Database | Oracle RAC | Oracle GoldenGate

Deloitte Consulting GmbH | Cologne, Düsseldorf, Germany — 04.2022 – 05.2024

Technical Consultant | 03.2023 – 05.2024

- Cloud Engineer Consultant focused on the design and delivery of enterprise cloud solutions. Led the deployment of secure landing zones compliant with BSI IT-Grundschutz and BSI C5 standards. Partnered with AWS and the Landing Zone Accelerator (LZA) team to develop a sovereign cloud Proof of Concept (POC) incorporating confidential

computing for public sector clients.

- Developed architectural documentation, including runbooks and playbooks, to standardize operations. Contributed to DevSecOps initiatives by building CI/CD pipelines and implemented Cloud FinOps reporting using Txture to manage resource costs.
- Facilitated the onboarding of nearshore teams and introduced low-code automation to streamline landing zone deployment across multi-cloud environments.

Tech Stack: AWS | Landing Zone Accelerator (LZA) | AWS CDK & CLI | CI/CD (AWS CodePipeline, GitHub Actions, Azure DevOps) | Txture | Python | Technical Documentation (Architecture, Runbooks)

Business Analyst | 04.2022 – 03.2023

- Cloud Engineer Analyst at Deloitte within the Cloud Transformation & Systems Engineering (CT&SE) unit. Collaborated in an international, agile environment to deliver iterative cloud-native applications and infrastructure for automotive sector clients.
- During this tenure, obtained professional certifications across AWS, GCP, Azure and OCI to support multi-cloud infrastructure modernization and DevSecOps initiatives.

Tech Stack: AWS | OCI | Terraform | CI/CD (GitHub Actions, Azure DevOps)

Education

Bootcamp: AWS re/Start Program in Cloud Computing | DCI Digital Career Institute | Cologne, Germany — 01.2022 – 04.2022

- Completed a technical training program focused on hands-on tasks in core AWS compute, storage, and networking services.
- Performed daily work with AWS CLI, CDK, and SDK alongside Shell and Python scripting to automate infrastructure configuration, management, and operational support tasks.
- Collaborated on small, team-based cloud projects, documenting technical workflows and delivering presentations on cloud concepts.
- Passed the AWS Certified Cloud Practitioner exam upon completion of the program.

Tech Stack: Linux CLI & Bash Scripting | AWS CLI, SDK, CDK | EC2, S3, Lambda, IAM, Elastic Beanstalk, Amazon RDS & Aurora, Amazon DynamoDB, Amazon API Gateway, AWS VPC, CloudWatch, CloudFormation | Python, JavaScript

Magister Artium (M.A) in Communication Sciences and Phonetics | University of Bonn | Bonn, Germany — 07.2004 – 07.2012

Principal subject:

- Communication Sciences and Phonetics with emphasis on Computational Linguistics

Subsidiary subject:

- Romance philology
- Ethnology with Emphasis on the social and economic development of the Pre-Columbian America
